## Health Care

The health care industry is complex and rapidly changing. Clients operating in this heavily regulated sector of the economy need experienced attorneys capable of delivering sound legal and business advice. Thorpe Shwer's team of business-savvy lawyers understand the unique challenges facing the industry. We work with medical practices, individual providers, insurance carriers, nutraceutical companies, and other industry participants to provide the

proactive and pragmatic counsel they need to overcome obstacles and achieve their commercial objectives.

Our attorneys focus on finding solutions that allow our health care clients to operate their businesses and perform their professions at the highest level. When issues and conflicts arise, we seek cost-conscious resolutions that make sense for our clients both short and long-term. Our legal team assists health care clients with a wide range of legal matters, including:

- Commercial litigation
- Vendor disputes
- Partnership dissolutions
- Covenants not to compete
- Insurance coverage denial claims
- Bad faith claims

When controversies surface, our attorneys are often able to negotiate favorable resolutions well before the dispute reaches the courtroom. However, if a workable agreement is unattainable, we aggressively advocate for our clients' positions in the appropriate forum, whether it be the court system, arbitration, or an administrative hearing. Thorpe Shwer attorneys are proud to serve the healthcare industry and are well known throughout Arizona and across the United States for their professionalism and commitment to excellence both in and outside of the courtroom.
