Motor Vehicle Accidents

Our attorneys have significant experience defending clients in actions arising from serious motor vehicle accidents. We understand that successfully defending our client's interest in a case involving severe injuries or death hinges upon systematic preparation including interviewing witnesses, retaining effective experts, developing a comprehensive understanding of the mechanics of the accident, and identifying those regulations and/or statutes that

may impact liability. Our attorneys are involved with every aspect of the case, from formulating and implementing strategic plans for pre-litigation investigation and evidence preservation to executing a solid defense strategy through discovery, trial, and appeal.
